

[9:07] Don M: gm ... thoughts?
 [9:09] Jellie1: I'm looking for oscillations early - market might be waiting on Europe Bank test results (to be released today at 12 noon). Like TUB of 96 area short with confirming divergence - was resistance 3 times last week. Also like TUB long of 85-86 area - ONL and previous day support.
 [9:10] Don M: yea, I'll tub any early dip toward 86-88
 [9:10] Don M: not sure how long I'll last today ... been trading since 3 cuz I wanted the first Europe pb
 [9:12] Jellie3: Agree with early oscillations.....but long bias. Market had plenty of bad news yesterday and shrugged it off. 96 area might be good for a scalp short - but I'm very leary about shorting there because we've hit it 3 times already.....could really have some upside if we can break through
 [9:12] Jellie4: agree, will watch open and tub yday's pm lows. I will be

careful about selling the high, many stops up in that area...which I could see them grab before the europe results are out. I also wonder if europe well dump risk before there weekend and the results are announced.
 [9:12] Jellie4: there = their
 [9:13] Don M: hmmm
 [9:13] Don M: any news?
